

Unit 1 - Minerals	40 Fresh Water Underground
1 What Is a Mineral?	41 Fresh Water as a Resource
2 Identifying a Mineral by Its Properties	42 Water Shortages
3 Mineral Identification Lab	Unit 11 - Ocean Systems
4 Mining and the Use of Minerals	43 Oceans Are Connected Systems
Unit 2 - Rocks	44 Ocean Floors
5 Rock Cycle	45 Movement of Ocean Water
6 Igneous Rock	46 Waves in the Ocean
7 Sedimentary Rock	47 What Causes Tides?
8 Metamorphic Rock	Unit 12 - Earth's Atmosphere
9 Chocolate Chip Rock Cycle and Song	48 Composition of Atmosphere
Unit 3 - Weathering and Soil	49 Air Pressure
10 Mechanical Weathering vs. Chemical Weathering	50 Can Crusher Lab
11 Properties of Soil	51 Layers of the Atmosphere
12 Climate Affects Soil	52 Air Quality – Pollution
Unit 4 - Erosion and Deposition	Unit 13 - Weather Factors
13 Earth's Surface Is Built Up and Worn Down	53 Energy from the Sun
14 Water Movement Shapes Land	54 Heat Transfer
15 Waves and Wind Shape Land	55 What Is Wind
16 Glaciers Change Land, Move Sediment	56 Local vs. Global Winds
Unit 5 - Plate Tectonics	57 Global Wind Belts
17 Composition vs. Physical Structure of Earth	58 Humidity
18 Map of the Plates	59 Types of Clouds
19 Continental Drift	60 Precipitation
20 Plate Boundaries	Unit 14 - Weather Patterns
21 Deforming Earth's Crust	61 Types of Air Masses
Unit 6 - Earthquakes	62 How Masses Move
22 What Are Earthquakes?	63 Types of Fronts
23 Measurement of Earthquakes	64 Cyclones vs. Anticyclones
24 Preparing for Earthquakes	65 Thunderstorms
Unit 7 - Mountains and Volcanoes	66 Tornadoes
25 Mountain Formation	67 Hurricanes
26 Volcanic Eruptions	68 Snowstorms
27 Types of Volcanoes	Unit 15 - Weather Predictions
28 Causes of Eruptions	69 Weather Forecasting
Unit 8 - Earth's Past	70 Weather Technology
29 Relative Dating	71 How to Read a Weather Map
30 Types of Unconformities	Unit 16 - Earth in Space
31 Absolute Dating	72 How Earth Moves
32 Types of Fossils	73 Earth's Seasons
33 Geologic Time Scale	74 Gravity and Motion
Unit 9 - Natural Resources	Unit 17 - Earth's Moon
34 Renewable vs. Nonrenewable	75 Phases of the Moon
35 Fossil Fuel	76 Lunar vs. Solar Eclipse
36 Conservation and Recycling	77 The Moon's Surface
37 Other Energy Sources	78 Origin and Characteristics of the Moon
Unit 10 - Earth's Fresh Waters	Unit 18 - Space Exploration
38 Water Cycle	79 History of Rockets
39 Frozen Fresh Water	80 How Do Rockets Work?

81 Multistage Rockets	96 Pluto
82 The Space Program	97 Speeding Around the Sun Lab
83 Working in Space	Unit 22 - Comets, Asteroids, and Meteors
84 Challenges of Space	98 Comets
Unit 19 - The Sun	99 Asteroids
85 Sun's Interior	100 Meteors
86 Sun's Atmosphere	Unit 23 - Telescopes
87 Features on the Sun	101 Electromagnetic Radiation
Unit 20 - Inner Planets	102 Types of Telescopes
88 Earth	103 Observatories
89 Mercury	Unit 24 - Stars
90 Venus	104 Classification of Stars
91 Mars	105 Measuring the Distance to Stars
Unit 21 - Outer Planets – Gas Giants	106 Hertzsprung-Russell Diagram
92 Jupiter	107 Lives of Stars
93 Saturn	108 Star Systems
94 Uranus	109 Galaxies
95 Neptune	110 Expanding Universe
